

The improved AVR (Automatic Voltage Regulator) limits voltage fluctuation to a very low level and ensures smooth and stable output. Additionally, the AVR features built-in overload protection and will automatically shut off the output at 110% of rated load.

Product Features

Designed for Simple Serviceability

Fully mounted base tank is standard on all generators in this series.

Generator base will hold 110% of total generator fluids (fuels, lubricants and coolants), ensuring containment of any spillage.

Plastic fuel tank reduces condensation and eliminates corrosion which prevents deterioration of the fuel supply.

Larger fuel tanks are standard equipment eliminating the need for frequent refueling.

Large doors provide easy access for preventive maintenance and servicing.

Cleaner, Safer and Quieter Sound Attenuated Canopy

All KIPOR generators meet or exceed relevant standards for noise and emission legislation.

Robust and Durable

Compact, robust and flexible structures ensure long service life and quiet operation.

Thicker paint treatments stand the wear and tear in extreme environmental conditions.

Sound Attenuated canopies feature a flame-proof, heat-resistant, heavy-duty rock wool sound insulation, providing superb noise level retention.

Doors are pressure locked to ensure a watertight seal.

Designed to be Easily Transported

Compact designs make it easy to fit into the tightest of confines while still providing optimum performance.

Forklift pockets are standard on all units.
